IPS VideoManager

Multi Site Management (MSM)

IPS VideoManager Multi Site Management (MSM) is an IP-based platform for the overall networking of independent video surveillance systems. It supports the central administration, control and configuration of an unlimited number of sites. In addition, it offers comprehensive alarm management and fully integrated, georeferencing functionalities with latest 3D Video Technology. This facilitates the secure construction and operation of security centres for global remote monitoring of innumerable sites.

Key features
- IP-based video management software
- Support of IP cameras and encoders

- Networking of local, independent systems
- Centralised data administration
- Overall, intuitive display, operation and alarm management
- Recording, playback and export of video and audio data
- Overall visualisation with site plans
- TimeMachine and WallControl
- Connection with third-party systems
- Active Directory support
- Handover of alarm objects between cameras
- Display of motion profiles in site plans
- Multiplication of live streams and alarm histories
- Support of access control via ONVIF (extra licence)
- Performance monitoring
- Support of the corridor format
- SNMP support

Applications
- Large, networked video surveillance systems
- Remote monitoring of local sites in security centres
- Combined video and access control systems

Benefits
- IP technology
- Flexible system architecture
- 3D georeferencing
- Security staff savings
- Optimum value for money

Intelligent Video Analytics

Right: Live page for display and easy navigation between different sites.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. Selected solution partners, providers and distributors successfully sell the current IPS products across Europe.

Technical specifications	
Requirements hardware	• Hardware requirements according to www.ips-analytics.com
Requirements software	• IPS VideoManager V5.0 or higher • Windows 7 SP1 (32/64 Bit) • Windows 8 and 8.1 Professional (64 Bit) • Windows Server 2008 R2 SP1 (64 Bit) • Windows Server 2012 (64 Bit)
System integration	• Continuous, unlimited scalability possible • Seamless integration of IPS VideoAnalytics with multi plugin architecture
Languages	• German, English, French, Italian, Spanish, Russian
Licences	• Information about VM licences at www.ips-analytics.com • Licensing with hardware dongle • Time-limited demo licences available
Subject to change without prior notice.
