

IPS VideoManager

MobileClient

IPS VideoManager MobileClient is a mobile application for the operation on iPad and iPhone. It offers instant and easy remote access to IPS VideoManager video surveillance systems. This facilitates the display, playback and alarm management of events within the surveillance area as well as the initiation of immediate measures if required.

Key features

- Camera administration
- Camera display with properties and status
- Control of PTZ cameras
- Control of I/O devices
- Triggering of predefined actions
- 3 operation levels: Alarm, Live, Playback
- Display of up to 4 video streams
- Display of meta data in video images
- Manual recording management
- Recording playback
- Recording search with time and event filter
- Alarm management with automatic alarm display and acoustic signal

Applications

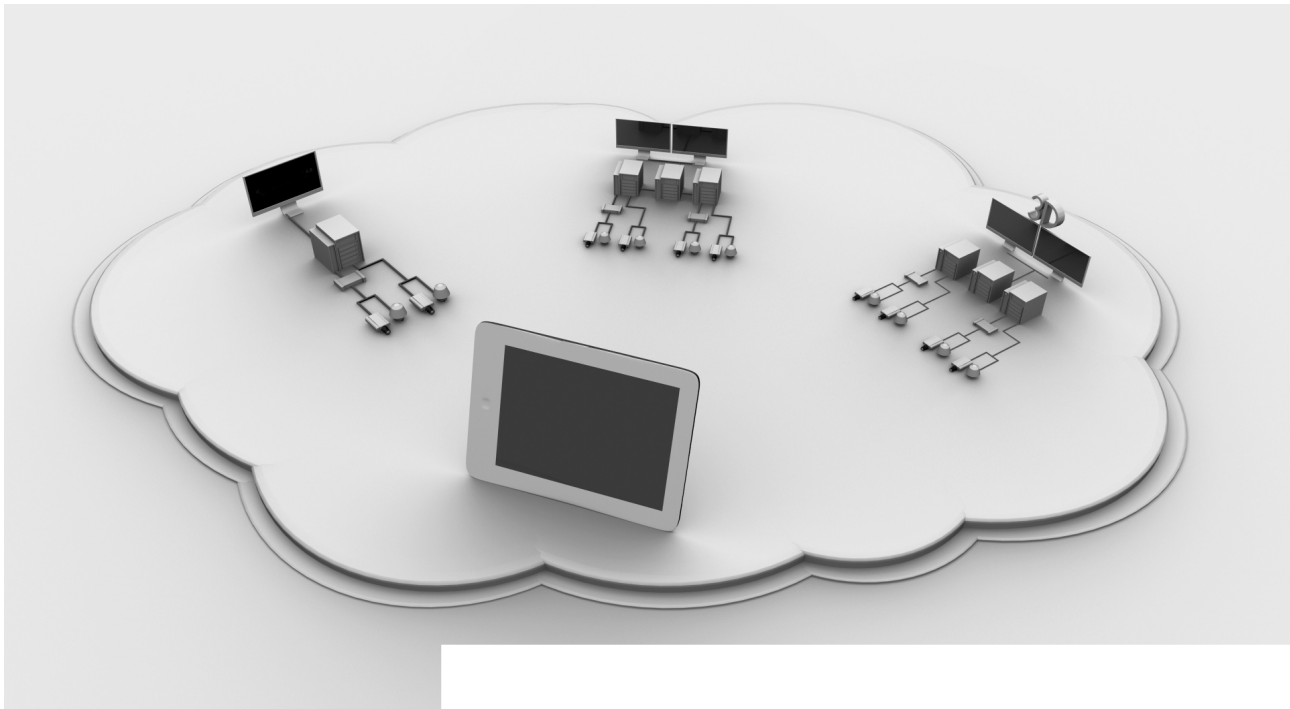

- Worldwide access to one or more, local video surveillance systems
- Mobile video surveillance on the road or at home

Benefits

- Easy remote access from anywhere at anytime
- Instant display, playback and management of events
- Wireless connection with 2G, 3G or WLAN
- Easy networking with NVR Pro, VMS and 3D VMS
- Optimum value for money

Intelligent Video Analytics

Above: Architecture for one or more, local video surveillance systems with MobileClient.

Right: Live page for monitoring (iPad) and control of PTZ cameras (iPhone).

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.
