

# IPS VideoManager

## Network Video Recorder (NVR)

**IPS VideoManager Network Video Recorder (NVR) is an IP-based platform for basic, single server video surveillance systems. It supports 4 up to 16 cameras and 5 viewers. The efficient architecture enables future extensions to an advanced Network Video Recorder Pro and the networking with an overall Multi Site Management.**

### Key features

- IP-based video management software
- Support of IP cameras and encoders
- Centralised data administration
- Intuitive display and operation
- Recording, playback and export of video and audio data
- Control of PTZ cameras and I/O devices
- Visualisation with site plans
- Support of the corridor format
- Performance monitoring
- SNMP support

### Applications

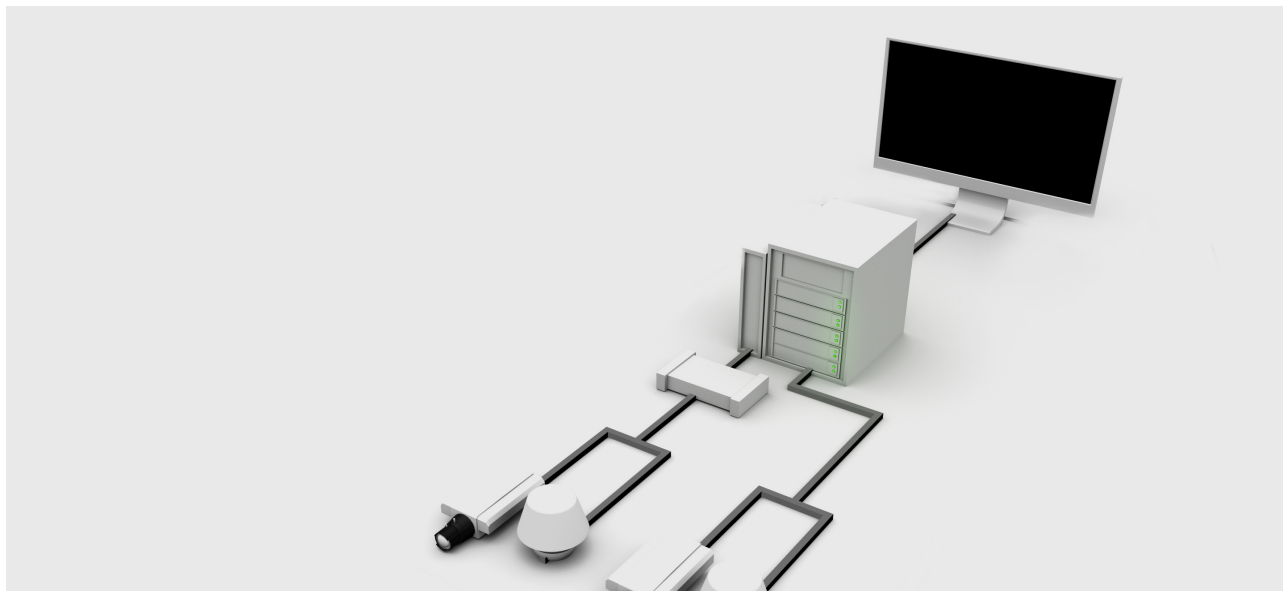

- Small, local video surveillance systems
- Replacement of DVRs and NVRs

### Benefits

- IP technology
- Single server systems
- Optional extension to NVR Pro
- Easy networking with MSM
- Optimum value for money

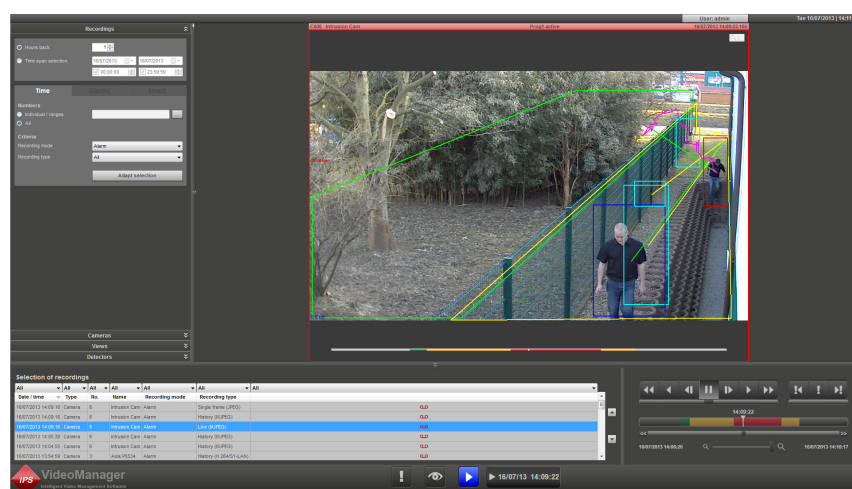

*Intelligent Video Analytics*

## IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.
