WebClient

IPS VideoManager

WebClient

IPS VideoManager WebClient is a web-based application for the flexible operation in heterogeneous system environments. It is supported from all the most common web browsers and offers efficient access to IPS VideoManager video surveillance systems. This facilitates the intuitive display, playback and alarm management anywhere from any Internet-enabled computer without prior installation of additional software.

Key features
- Camera administration
- Camera display with properties and status
- Control of PTZ cameras
- Control of I/O devices
- Triggering of predefined actions
- 3 operation levels: Alarm, Live, Playback
- Display of up to 4 video streams
- Display of meta data in video images
- Manual recording management
- Recording playback
- Recording search with time and event filter
- Alarm management with automatic alarm display and acoustic signal

Applications
- Worldwide access to one or more, local video surveillance systems
- Flexible use on different operating systems and platforms

Benefits
- Efficient access without prior installation of additional software
- Intuitive display, playback and alarm management
- Support of all the most common web browsers
- Easy networking with NVR Pro, VMS and 3D VMS
- Optimum value for money

Intelligent Video Analytics

IPS

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. Selected solution partners, providers and distributors successfully sell the current IPS products across Europe.

Technical specifications	
Requirements hardware	• Computer with Internet connection • Requires Microsoft Windows, Linux or Apple OS X operating system
Requirements software	• IPS VideoManager V5.0 or higher • Microsoft Internet Explorer • Mozilla Firefox • Apple Safari
System integration	• Installation-free usage of the application in web browser • Easy networking with IPS VideoManager systems over Transcoder
Languages	• German, English
Licences	• VM Licence WebClient • Licensing with hardware dongle • Time-limited demo licences available
Subject to change without prior notice.
